

2026 BLUE EDGE COMPANY PROFILE

—

COMPANY OVERVIEW

ABOUT OUR COMPANY

Blue Edge Company is a technology solutions provider delivering integrated software platforms and hardware systems that enhance operational efficiency, security, automation, and digital collaboration. We support enterprises, government entities, developers, and multi-site organizations with scalable, secure, and future-ready solutions.

SOLUTIONS OVERVIEW

01

HARDWARE SOLUTIONS

Smart infrastructure, professional displays, and connected devices designed to integrate seamlessly with centralized management platforms.

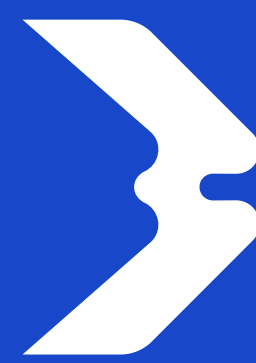

02

SOFTWARE SOLUTIONS

Intelligent platforms that enable visibility, control, analytics, and operational decision-making across distributed systems.

Together, these solutions create unified, efficient, and secure technology environments.

01

HARDWARE SOLUTIONS

Smart, reliable hardware systems designed to support automation, collaboration, and connected environments.

DAHUA SMART INTERACTIVE SCREENS

Dahua Smart Interactive Screens are advanced AI-powered collaboration displays designed to enhance communication, productivity, and teamwork. Featuring ultra-HD touch displays, wireless screen sharing, intelligent whiteboarding, and seamless video conferencing, they provide an all-in-one solution for modern meeting rooms, classrooms, and collaborative workspaces.

Video Conferencing & Meeting Room Solutions

Advanced video conferencing systems provide high-quality audio, video, and screen sharing to support productive meetings. These solutions enable efficient communication and collaboration between teams, clients, and remote offices.

SMART INFRASTRUCTURE & BUILDING SYSTEMS

Integrated smart infrastructure hardware including automation controllers, sensors, access systems, and building control devices. These systems enable centralized management of facilities, enhance operational efficiency, improve safety, and support scalable smart building and smart city initiatives.

Digital Signage & Interactive Displays with CMS Solutions

Digital Signage and Interactive Displays deliver dynamic visual communication through high-resolution screens and touch-enabled displays. They are used for advertising, information sharing, presentations, and customer engagement in corporate, retail, and public environments.

—

Video Surveillance Systems (CCTV)

Modern video surveillance systems use high-definition cameras and intelligent monitoring platforms to provide continuous security coverage. These solutions support real-time monitoring, recording, and smart analytics to enhance safety and incident response.

—

Access Control & Identity Management

Access control solutions regulate entry to buildings, offices, and restricted areas using secure authentication methods such as biometric identification, smart cards, or mobile credentials while providing centralized monitoring and access management.

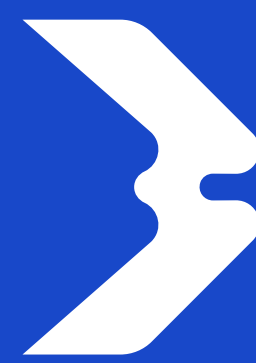

—

Intercom & Communication Systems

Intercom systems enable real-time voice and video communication between entry points, departments, and rooms, improving coordination, visitor management, and internal communication within buildings.

—

02

SOFTWARE SOLUTIONS

Intelligent platforms designed to connect systems,
centralize operations, and transform data
into actionable insight.

NINJAONE PLATFORM

NinjaOne is a leading cloud-based IT management platform that enables organizations to monitor, manage, secure, and support endpoints from a single, centralized dashboard. With powerful automation, remote management, patch management, backup, endpoint security, and mobile device management capabilities, NinjaOne helps IT teams improve operational efficiency, reduce downtime, and strengthen cybersecurity across their entire IT environment.

KNOWBE4 HRM CYBERSECURITY AWARENESS

KnowBe4 Human Risk Management (HRM) is a leading cybersecurity awareness and human risk management platform that helps organizations reduce cyber threats by educating employees, strengthening security culture, and minimizing human error. It offers security awareness training, phishing simulations, compliance training, and risk analytics to build a security-conscious workforce and improve overall cyber resilience.

APPLOYE (NEXT GENERATION EMPLOYEE PRODUCTIVITY PLATFORM)

Apploye is a next-generation employee productivity platform that helps organizations streamline workforce management, improve collaboration, and enhance operational efficiency. With intelligent productivity tracking, task management, attendance monitoring, and performance insights, Apploye empowers businesses to optimize employee performance while supporting a more productive and connected workplace.

Endpoint Protection (EDR, Antivirus, Email Security)

Endpoint Protection safeguards computers, servers, and mobile devices from cyber threats. It combines advanced EDR monitoring, antivirus defense, and secure email filtering to detect, block, and respond to malware, ransomware, phishing, and other security risks across the organization.

Network & Firewall Security Solutions

Network security solutions safeguard IT infrastructure by monitoring traffic, preventing unauthorized access, and defending against cyber threats through advanced firewall systems and network protection technologies.
